TESTIMONIAL

We are a relatively new company, and when we first started trading we purchased a laser printer direct from Dell's website.

We were very unhappy with the level of customer service we received from Dell as there were problems with the printer from the start, and whenever we tried to resolve them they were more keen to put us through to the sales team to sell us replacement ink cartridges than resolve our issues.

We recently moved to new offices and decided to buy a new laser printer, Mark came to our offices personally to discuss our needs and sourced a cost-effective solution that met our requirements.

His team are very friendly and helpful and react quickly to issues as they arise. However the most noticeable difference is the cost, with the old Dell printer we were paying approximately £200 per month for ink cartridges, by comparison our last bill from Sharples was just £25! An estimated saving of over £2,000 per year.

Thank you Mark, we would have no hesitation in buying all of our future printers from you and recommending you to others.

Yours faithfully

Matthew Jones
Director
